

# Total Questions: 40

## Latest Version: 6.0

### Question: 1

A sales leader wants to agents to generate customer communications that match their company's tone.

Which two customizations should the sales leader make to the agent template?

- A. Create additional topics depicting various customer interaction scenarios
- B. Disable LLM-based content generation
- C. Limit the agent to internal notification messages only
- D. Modify the system prompt to specify tone and language preference

**Answer: A, D**

### Question: 2

A supply chain specialist uses the Outbound Compliance Agent template but needs to ensure that agent accounts for recently updated hazardous material regulations.

- A. In which two ways can the specialist customize the OOTB agent?
- B. Remove access to business object tools to restrict data retrieval
- C. Create additional topics to address specific regulation updates
- D. Revise the system prompt to provide information on new regulatory requirements
- D. Replacement the semantic search function with manual document lookup

**Answer: B, C**

### Question: 3

A financial controller implements a Pricing Promotions Agent template, but industry promotions require industry-specific compliance language in promotional summaries.

In which two ways can the controller customize the agent template to address this requirement?

- A. Add topics detailing specific compliance requirements by promotion type

- B. Remove all access to past promotional data for agent responses
- C. Change the AI model to a multilingual version for broader coverage
- D. Update the system prompt with compliance language for industry-specific promotions

**Answer: A, D**

#### Question: 4

When preparing to test agents in AI Agent Studio, how do you use evaluation test data?

- A. Use evaluation test data to automatically fine-tune the LLM behind the agent
- B. Upload a collection of test input and reference answers to compare agent performance during offline testing
- C. Add evaluation sets to determine which business objects are available to the agent at runtime

**Answer: B**

#### Question: 5

Which two features are essential for structured agent testing?

- A. Dynamic role-based credential swapping for access
- B. Comparison of evaluation runs for changes
- C. Overclocking application servers for testing
- D. Evaluation test data management for storing test cases

**Answer: B, D**

#### Question: 6

During agent testing, how do metrics for latency and tokens help ensure quality?

- A. Capture the amount of time saved due to business process optimization and user adoption rates
- B. Confirm that the agent response wait time is acceptable and indicates the financial cost of running the agent
- C. Confirm the accuracy of the agent responses and measure the overall efficiency of the agent

**Answer: B**

### Question: 7

Which set of metrics evaluates an agent's security in Oracle AI Agent Studio?

- A. User and Token count
- B. Prompt injection and content safety metrics
- C. LLM requests and latency

**Answer: B**

### Question: 8

A project lead is setting up an agent to retrieve and summarize shift data from Oracle Fusion. What can be done to minimize exposure of unrelated or confidential information?

- A. Align agent access rules with existing user permissions
- B. Set up the agent for public data sharing to promote transparency
- C. Limit the agent's queries and responses to specific, relevant business object fields

**Answer: A**

### Question: 9

A developer wants to ensure that data retrieved by an agent reflects the latest and most accurate information while remaining secure. How can this requirement be met?

- A. Mask the agent's access to data
- B. Prevent duplication of data by operating the agent outside of Fusion
- C. Enable broad data exports for convenience
- D. Access business objects within fusion where the secure data resides

**Answer: D**

### Question: 10

What distinguishes a Reasoning agent from a standard Answer Agent in Oracle AI Agent Studio?

- A. Reasoning agents only provide summarized information based on user queries, while answer perform complex calculations
- B. Reasoning agents can plan, optimize, and execute multi-step workflow, while Answer agents primarily provide contextual guidance or responses
- C. Reasoning agents are limited to generating marketing content, while Answer Agents automate approvals on behalf of user

**Answer: B**

### Question: 11

How is the external REST tool utilized within oracle AI Agent Studio?

- A. It enable Agents to exchange information from system outside of Fusion Application through defined APIs
- B. It helps create deep links within Fusion Application to navigate users to specific pages
- C. It generates template for presonalized user interfaces for agent interactions across various channels

**Answer: A**

### Question: 12

A retail company needs to streamline its order-to-cash process by using an AI Agent in Oracle AI Agent Studio to generate invoices and send them directly to customers.  
Which two tools are required to build this automation?

- A. Business Object tools for accessing invoice data and Email for sending customer communications
- B. External BEST tool for connecting to a payment gateway and Deep Link for directing users to account pages
- C. Document tool for uploading invoices and Calculator tool for verify accurate invoices

D. Notification tools for sending SMS alerts and User Session tool for customizing interface themes

**Answer: A**

### Question: 13

When configuration agents in Oracle AI Agent Studio, Which two types of tools can be included within agent workflow?

- A. External REST tools for connecting to other systems
- B. Business Object tool for data transactions
- C. Formula Builder tools for financial forecasting
- D. Survey tools for collecting employee feedback

**Answer: A, B**

### Question: 14

A developer notices that not all have access to sensitive customer information. Which feature of AI Agent Studio control data that each agent can use?

- A. Fusion's role-based access controls
- B. Pre-configured system prompts
- C. Document tools folder permissions
- D. Integration defined in Rest tool

**Answer: A**

### Question: 15

For an AI Agent configured to update employee data in Fusion Applications, what method within AI Agent Studio ensures sensitive changes are securely managed?

- A. Configure the agent to send alerts to stakeholders after sensitive data is updated
- B. Add a human-in-the-loop step that requires approval before changing sensitive data
- C. Set agent permissions to restrict certain update actions to specific business hours"

**Answer: B**

### Question: 16

What are the components of Oracle AI Agent Studio?

- A. Workflow templates, custom scripts, and scheduling triggers
- B. Process orchestrators, data connectors, and security profiles
- C. Agent teams, tools, templates, and topics"

**Answer: B**

### Question: 17

You need an agent to fetch real-time sales order status from an external logistics platform. Which tool in AI Agent Studio helps build this automation?

- A. External REST tool
- B. User Session tool
- C. Document tool
- D. Business Object tool"

**Answer: A**

### Question: 18

When would you use a multi-agent solution?

- A. For orchestrating complex processes involving multiple specialized tasks
- B. When the agent is sending standardized notifications without further processing
- C. When addressing inquiries that require only a single data lookup"

**Answer: A**

### Question: 19

Which two dashboard metrics in AI Agent Studio are useful for monitoring agent performance at run time?

- A. Correctness score
- B. User interface color scheme
- C. Number of team meetings held
- D. Median or P99 latency"

**Answer: A, D**

### Question: 20

A business analyst is asked to monitor quality over time for a compensation planning agent. The analyst wants a single point of access to the agent's correctness scores and safety results, updated continuously.

Which AI Agent Studio feature should be used?

- A. Metrics Reporting Dashboard
- B. Token Usage Report
- C. Business Object tool
- D. Evaluation Set Uploader

**Answer: A**

### Question: 21

Which metric is used to calculate the financial cost of using an AI Agent?

- A. Tokens consumed
- B. Accuracy
- C. Latency
- D. Number of users

**Answer: A**

### Question: 22

How do you assess the output quality of two versions of an agent?

- A. Run an evaluation of each agent using expected inputs and outputs
- B. Analyze token counts for each agent in the Metrics Reporting Dashboard
- C. Change the agent's system prompt in AI Studio while they are running

**Answer: A**

### Question: 23

How do you use the agent tracing feature in the Metrics Reporting Dashboard?

- A. To update agent security permissions based on detected access vulnerabilities
- B. To review specific prompts for analyzing inputs, outputs, and performance metrics
- C. To modify an agent's security roles directly from the trace files

**Answer: B**

### Question: 24

Executives require high-level report on how often agents run into errors, how quickly most queries are resolved, and the general quality of the agents' performance for quarterly review. Which two metrics in AI Agent Studio would deliver the required insights?

- A. Prompt Injection
- B. LLM Requests
- C. Median Correctness
- D. Error Rate and Median/P99 Latency Reporting

**Answer: C, D**

### Question: 25

A company wants to implement an AI Agent to automate its customer service process. They want to use a tool to integrate with their CRM system to retrieve customer data. What type of tool should they use?

- A. Document tool
- B. External REST tool
- C. Email tool
- D. Business Object tool"

**Answer: B**

### Question: 26

A developer wants an agent to integrate data from inventory management system using the system's public API. Which tool can meet this requirement?

- A. Business Object tool, to connect to data in Fusion
- B. Document tool, to ensure inventory levels are correct
- C. Email tool, to send inventory level alerts
- D. External REST tool, to connect to a system outside of Fusion

**Answer: D**

### Question: 27

Which tool can be used for enabling an agent to send summary notifications to users after key transactions?

- A. Deep Link tool, to send users to specific pages
- B. Business Object tool, to record transaction metadata
- C. Calculator tool, to compute notification frequencies
- D. Email tool, to write and send summary emails to recipients

**Answer: D**

### Question: 28

A department requires an agent workflow that must access data in a third party system and custom data objects with Fusion Applications.

What should the department do to build this agent in AI Agent Studio?

- A. Build the agent workflow from scratch
- B. Use generative AI services instead of an agent
- C. Select and customize a pre-built agent template
- D. Add an email tool to the agent workflow

**Answer: C**

### Question: 29

An agent needs to summarize information from uploaded company manuals or guides to provide up-to-date answers for users.

Which tool in AI Agent Studio should be used?

- A. Accuracy tool, to determine how many answers are correct
- B. Document tool, to enable semantic search to base responses in unstructured documents
- C. Business Object tool, to change information found in the manuals or guides
- D. Deep Link tool, to direct users to relevant pages or application interfaces

**Answer: B**

### Question: 30

When working in AI Agent Studio, what are the two reasons a user might decide to clone an out-of-the-box (OOTB) agent template?

- A. To bypass Fusion's role-based security controls for agent operations
- B. To extend the agent's functionality by adding new tools or integrations unique to a use case
- C. To customize the agent's system prompts and topics for organization-specific requirements
- D. To publish the cloned agent directly to Oracle Partner Marketplace

**Answer: B, C**

### Question: 31

An HR manager wants a solution that allows managers to access employee information and initiate transactions like promotions within a single conversational interface.  
When selecting a pre-built agent template for this purpose, which OOTB agent should be used?

- A. Pay Analyst agent, which provides automated notifications for payroll cycle completions
- B. Personal and Employment Details Agent, which retrieves personal and employment details and can generate deep links for HR transactions
- C. Compensation Advisor, which manages the workflow for approving new benefits enrollments
- D. Leave and Absence Analyst, which creates and sends summary reports of team vacation usage to upper management

**Answer: B**

### Question: 32

Which two scenarios require an agent to use the External REST tool?

- A. When an agent is expected to pause for a set period of time before responding
- B. When an agent needs to retrieve data from an internal compliance database
- C. When an agent needs to perform calculations on Fusion business objects
- D. When an agent needs to access data from a third-party logistics systems

**Answer: B, D**

### Question: 33

The HR team wants to provide employees with a self-service agent that can answer questions about the company's medical, dental, and vision benefits.  
Which OOTB Agent template fits this scenario?

- A. Benefits Agent
- B. Help Desk Knowledge Agent
- C. SR Triage Agent
- D. Narrative Reporting Agent

**Answer: A**

### Question: 34

Which pre-built agent in Oracle Fusion HCM enables users to review salary progression, additional compensation, and compare salary decisions for their teams based on market trends and benchmarks, across employees?

- A. Compensation Agent
- B. Personal and Employment Details Agent
- C. Payslip Agent
- D. Benefits Agent

**Answer: A**

### Question: 35

An HR administrator wants to quickly deploy an agent to help employees navigate company benefits and tailor the agent's responses to their organization's specific policies. Which two steps can the administrator take using prebuilt templates in AI Agent Studio?

- A. Modify the agent's source code within the template editor
- B. Customize the system prompt of the Benefits Agent template with company policy details
- C. Adjust the agent's topics to cover organization-specific benefits scenarios
- D. Import policy data by uploading documents directly to the agent template

**Answer: B, C**

### Question: 36

When using prebuilt templates in AI Agent Studio, which two actions are supported?

- A. Designing single-agent workflows to meet business requirements
- B. Scheduling automatic deletion of inactive agent templates after a set period
- C. Configuring and deploying Oracle-delivered agents rapidly using a catalog of templates
- D. Importing existing agents from external cloud platforms for template customization

**Answer: A, C**

### Question: 37

Before publishing a new agent built from a template in AI Agent Studio, which two actions must be completed?

- A. Assigning the agent to a business object group for version control
- B. Configuring user session parameters to enable semantic search
- C. Performing design time/offline testing to ensure the agent works correctly
- D. Reviewing and adjusting the agent's system prompt and topics as needed

**Answer: C, D**

### Question: 38

A finance team wants to automate the creation of narrative reports using AI Agent Studio. Which two methods are available to streamline report generation?

- A. Enable multi-language support for narrative reports by adjusting agent workflow settings
- B. Use a prebuilt agent template designed for narrative reporting
- C. Change the data visualization library used by the narrative reporting agent template
- D. Customize the system prompt to align the agent's tone and content to company standards

**Answer: B, D**

### Question: 39

Your support lead wants to optimize agent workflow for both accuracy and customer wait time. Which combination of metrics should they use?

- A. Input and Output Token Counts
- B. Token Usage and Latency
- C. Error Rate and User Token
- D. Correctness and Latency

**Answer: D**

**Question: 40**

You are reviewing an agent that is in production. Your client wants you to improve the agent's logic and requires you to build a new version.

To confirm that an agent's logic has improved in a new version after deployment, which AI Agent Studio capability should you use?

- A. Perform a semantic search for similarity of the two versions
- B. Use the Document tool to compare the versions
- C. Run a comparative analysis of the two versions

**Answer: C**
